

Core Wellness Centre is excited to bring the AMIT system, featured in the movie "Doctored," to the Midwest so local athletes at all technical levels can recover faster from injury, prevent future damage, and enhance their dance performance.

Unlike conventional treatments, AMIT rapidly identifies and heals the root cause of injury and dysfunction, removes pain, reveals areas at risk and improves performance **without the use of drugs or surgery.**

For over 27 years, amateur, professional and Olympic athletes have depended upon AMIT to deliver amazing results. In fact, the NBA Utah Jazz players missed 50% fewer games due to injury than the league average by being treated with AMIT. Athletes Torah Bright, Travis Jayner, John Stockton, Picabo Street, Steve Nyman, Bill Romanowski, and many others have received both healing and performance benefits far beyond the expectations of even these elite competitors.

Dr. Zanelli has trained over 200 hours with Dr. Craig Buhler, the leading authority on AMIT, to be able to provide this breakthrough treatment and have her patients achieve the lasting success AMIT brings.

About Core Wellness Centre and Dr. Patricia Zanelli

Core Wellness Centre offers a comprehensive range of chiropractic services to relieve pain, restore function and help patients achieve the highest level of performance obtainable. We treat people who are at every fitness level - from everyday active people to elite athletes, professional dancers and everyone in between.

Dr. Patricia Zanelli received her doctorate in chiropractic medicine from National College of Chiropractic in Lombard, Illinois and has spent over 18 years completing thousands of hours of post-doctoral training in order to effectively diagnose, treat and increase the health and physical performance of her patients. Call us today to find out how she can help you!

athletic performance

AMIT – Take control

Recover faster - Play better

- Are you not as strong as you think you should be, given how hard you work out?
- Are other athletes performing moves more precisely than you with seemingly less effort?
- Are certain actions always painful, uncomfortable, or just difficult to execute smoothly?
- Are you unable to perform with equal strength and flexibility on both sides?
- Do your muscles fatigue easily and do you struggle to maintain good form for the entire game?

For many athletes, these challenges often end in pain and frustration. However, you don't have to experience these roadblocks.

AMIT is a breakthrough treatment option that quickly and effectively identifies and addresses the root cause of your pain and dysfunction. Symptoms are eliminated and future problems avoided entirely. You recover more quickly, stay healthier, and can take your sport to the next level.

AMIT gives you the edge over your competition – whether you want to excel in school/private sports leagues, be scouted for college, or compete in the professional sports world.

The only question you should be asking yourself now is: How can I afford not to turn to AMIT when I am injured, in pain, or want the best performance possible?

Why Athletes Need AMIT

Athletes always strive for perfection but the drive to be the best often pushes muscles beyond their limits.

When an athlete overloads a muscle, the body “shuts off” this damaged muscle to stop further injury. Other muscles step in to bear the load of this non-functioning muscle. These muscles try to compensate but since they are doing a job they weren't designed to do, they eventually also fail due to the increased physical demands. This leaves the athletes with instabilities around the joint these muscles support.

As this cycle continues, function deteriorates. This is when an athlete notices a plateau or even a decrease in their ability in spite of more practice time. The athlete is now at risk for further injury, chronic pain, and/or less than optimal performance.

Dr. Zanelli uses AMIT to re-activate these shut down muscles so athletes can completely recover from injury in the shortest amount of time. Once balanced, muscles can work at full function and the body can efficiently operate, pain-free, at the highest level of sport performance imaginable.

Contact Core Wellness Centre today to see how AMIT can benefit your athletic development.
